The new Ancot Ultra2080/Lite is the premier tool for debugging and optimizing SCSI devices and systems. Built on the success of the industry-leading Ancot Ultra2000, the Ultra2080/Lite provides high performance, hardware-based trace capture, filtering and triggering capabilities.

With a timing resolution of 4 ns, the Ultra2080/Lite is fully capable of capturing and displaying all SCSI bus activity at Ultra2 speeds of 80 MB/s. Large trace memory (up to 524,000 events), initiator emulation, 10/100 Mb Ethernet data transfer, remote control via a LAN connection and an internal hard drive combine to make the Ultra2080/Lite the new industry standard for high-performance SCSI analyzers.

Ancot's new Ultra2080/Lite SCSI Bus Analyzer provides a powerful and economical tool for developing, debugging and optimizing SCSI systems and devices. By capturing and displaying SCSI traffic, including all commands and data, the Ultra2080/Lite shows the user a complete and easy-to-understand picture of SCSI bus activity.

The Ultra2080/Lite allows the user to connect to the analyzer via either a serial port or an Ethernet interface. The Ethernet interface allows the user to control the system from the convenience of a remote desktop system. No dedicated PC system is required—just plug in the Ethernet cable, return to your office, connect to the analyzer from your desktop, and run the analyzer entirely from your desktop workstation!

The Ultra2080/Lite is an essential tool for developing device drivers and firmware for SCSI devices and host bus adapters. By providing a direct view of bus activity, the Ultra2080/Lite enables engineers to quickly locate sources of problems and ensure compliance with all specifications.

The Ultra2080/Lite is also an aid to system integrators, to ensure quick identification of problems and to help optimize performance of SCSI devices in heavily-loaded and high data rate environments. The Ultra2080/Lite is the simplest and easiest way to identify the source of bus hangs, device errors, timing mismatches and a host of other potential problems.
